

GREENLEAF PRODUCTIONS INC.

NEWS RELEASE

**GreenLeaf Productions Inc. Receives Cannabis Standard Processing Licence  
and Medical Sales Licence from Health Canada**

St. Thomas, Ontario / September 6, 2019 – GreenLeaf Productions Inc. is pleased to announce they have just been issued their Standard Processing and Sale for Medical Purposes licence in accordance with the Cannabis Act and Cannabis Regulations by Health Canada. This is one of only 157 Standard Processing licences in Canada.

Privately owned and operated, GreenLeaf Productions Inc. has built the state of art cannabis extraction facility located at 3 Barrie Blvd in St. Thomas, providing customized cannabis oil extraction services for Canadian cannabis and hemp producers. The only one of its kind in Canada, GreenLeaf uses a state of the art ethanol system and proprietary extraction technology to provide a superior yield with the clarity, colour and purity customers look for. Its extraction process will change the industry by creating industrial scale extraction with a small operational footprint and reduced operating costs. By employing emerging technologies, GreenLeaf Productions Inc. expects to process biomass at a volume of 1700 kg/day, all while maintaining a top-quality product.

GreenLeaf's extraction process will be able to create custom THC, CBD and terpene blends that are specifically tailored to the requirements of their customers: cannabis producers, industrial hemp farmers, product manufacturers, researchers, retailers and exporters regulated under the Canadian framework.

ON BEHALF OF THE EXECUTIVE,  
Mike Hodgson, President & CEO (519) 860-9640
